A Course in Topological Combinatorics (Universitext) Mark de Longueville

A Course in Topological Combinatorics is the first undergraduate textbook on the field of topological combinatorics, a subject that has become an active and innovative research area in mathematics over the last thirty years with growing applications in math, computer science, and other applied areas. Topological combinatorics is concerned with solutions to combinatorial problems by applying topological tools. In most cases these solutions are very elegant and the connection between combinatorics and topology often arises as an unexpected surprise.

The textbook covers topics such as fair division, graph coloring problems, evasiveness of graph properties, and embedding problems from discrete geometry. The text contains a large number of figures that support the understanding of concepts and proofs. In many cases several alternative proofs for the same result are given, and each chapter ends with a series of exercises. The extensive appendix makes the book completely self-contained.

The textbook is well suited for advanced undergraduate or beginning graduate mathematics students. Previous knowledge in topology or graph theory is helpful but not necessary. The text may be used as a basis for a one- or two-semester course as well as a supplementary text for a topology or combinatorics class.

From reader reviews:

Mark Ames:

The book A Course in Topological Combinatorics (Universitext) can give more knowledge and information about everything you want. So just why must we leave a good thing like a book A Course in Topological Combinatorics (Universitext)? Several of you have a different opinion about reserve. But one aim that book can give many details for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or data that you take for that, you are able to give for each other; you are able to share all of these. Book A Course in Topological Combinatorics (Universitext) has simple shape but you know: it has great and big function for you. You can search the enormous world by open and read a guide. So it is very wonderful.

Joseph Cole:

Playing with family within a park, coming to see the marine world or hanging out with good friends is thing that usually you have done when you have spare time, after that why you don't try issue that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love A Course in Topological Combinatorics (Universitext), it is possible to enjoy both. It is very good combination right, you still would like to miss it? What kind of hangout type is it? Oh can occur its mind hangout men. What? Still don't get it, oh come on its called reading friends.

Rose Taylor:

Reading a book to get new life style in this yr; every people loves to examine a book. When you read a book you can get a lot of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you would like get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, and also soon. The A Course in Topological Combinatorics (Universitext) provide you with new experience in reading through a book.

Laurie Cales:

You may get this A Course in Topological Combinatorics (Universitext) by go to the bookstore or Mall. Only viewing or reviewing it can to be your solve challenge if you get difficulties for the knowledge. Kinds of this reserve are various. Not only by simply written or printed and also can you enjoy this book by means of e-book. In the modern era like now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose proper ways for you.
