Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) Lingjie Duan, Jianwei Huang, Biying Shou
This SpringerBrief provides an overview of cognitive mobile virtual network operator's (C-MVNO) decisions under investment flexibility, supply uncertainty, and market competition in cognitive radio networks. This is a new research area at the nexus of cognitive radio engineering and microeconomics. The authors focus on an operator's joint spectrum investment and service pricing decisions. The readers will learn how to tradeoff the two flexible investment choices (dynamic spectrum leasing and spectrum sensing) under supply uncertainty. Furthermore, if there is more than one operator, we present analysis of the competition among operators in obtaining spectrum and pricing services to attract users.

The brief is designed for professionals working with C-MVNOs. Succinct and practical, it will assist them in making optimal investments and pricing decisions. It will also be of interest to researchers.

From reader reviews:

Jose Reed:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite publication and reading a e-book. Beside you can solve your condition; you can add your knowledge by the guide entitled Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science). Try to stumble through book Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) as your good friend. It means that it can to be your friend when you sense alone and beside that course make you smarter than ever. Yeah, it is very fortuned to suit your needs. The book makes you considerably more confidence because you can know every thing by the book. So , we need to make new experience along with knowledge with this book.

Rose Bennett:

In this 21st centuries, people become competitive in every single way. By being competitive currently, people have do something to make these people survives, being in the middle of the crowded place and notice through surrounding. One thing that often many people have underestimated it for a while is reading. Yep, by reading a guide your ability to survive increase then having chance to remain than other is high. To suit your needs who want to start reading a book, we give you this Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) book as nice and daily reading e-book. Why, because this book is more than just a book.

Charles Branch:

Do you certainly one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys this aren't like that. This Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) book is readable simply by you who hate those straight word style. You will find the data here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to deliver to you. The writer of Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different as it. So , do you even now thinking Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) is not loveable to be your top collection reading book?

Crystal Thomas:

You may get this Cognitive Virtual Network Operator Games (SpringerBriefs in Computer Science) by visit the bookstore or Mall. Just viewing or reviewing it could possibly to be your solve challenge if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by means of written or printed but can you enjoy this book by e-book. In the modern era like now, you just looking from your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to

choose correct ways for you.
