## Endocrine Neoplasia: 153 (Cancer Treatment and Research)

Endocrine Neoplasia is a comprehensive, updated, and clearly-written text covering the diseases for which endocrine surgical expertise is often needed. We look towards advances in the science and the art of endocrine surgery to continuously improve outcomes for our patients. The goal of this text was to provide a detailed description of both the underlying science of disease as well as the art of clinical management.

The book is divided into five sections addressing neoplasms of the thyroid, parathyroid, adrenal gland, neuroendocrine pancreas, and multiple endocrine neoplasia. Experts from the United States, Canada, and Australia have contributed chapters addressing both the biology of endocrine tumors and the clinical management of disease. Recent discoveries regarding the genetic underpinnings of disease are highlighted. Updated consensus guidelines were used for clinical recommendations. The management of complex and often confusing clinical problems is discussed in detail.
