Biotechnology of Lignocellulose: Theory and Practice

Hongzhang Chen

Biotechnology of Lignocellulose: Theory and Practice Hongzhang Chen

This book presents and summarizes the new thoughts, new methods and new achievements that have emerged in the biotechnology of lignocellulose in recent years. It proposes new concepts including the primary refining, fractionation, multi-level utilization and selective structural separation of lignocellulose, etc. By approaching lignocellulose as a multi-level resource, biotechnology could have a significant effect on ecological agriculture, bio-energy, the chemical and paper making industries, etc., ultimately establishing distinctive eco-industrial parks for lignocellulose. Additionally, this book provides systematic research methods for the biotechnology of lignocellulose including investigation methods for the primary refining of lignocellulose, for microbial degradation and enzymatic hydrolysis, for cellulose fermentation and for lignocellulose conversion processes. It offers an excellent reference work and guide for scientists engaging in research on lignocellulose. Dr. Hongzhang Chen is a Professor at the Institute of Process Engineering of the Chinese Academy of Sciences, Beijing, China.

From reader reviews:

Viola Boucher:

Do you have something that you prefer such as book? The e-book lovers usually prefer to pick book like comic, brief story and the biggest some may be novel. Now, why not trying Biotechnology of Lignocellulose: Theory and Practice that give your pleasure preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be stated constantly that reading habit only for the geeky person but for all of you who wants to possibly be success person. So , for every you who want to start reading through as your good habit, you are able to pick Biotechnology of Lignocellulose: Theory and Practice become your personal starter.

Debra Ruff:

Are you kind of active person, only have 10 or maybe 15 minute in your day to upgrading your mind expertise or thinking skill also analytical thinking? Then you have problem with the book than can satisfy your small amount of time to read it because all this time you only find book that need more time to be study. Biotechnology of Lignocellulose: Theory and Practice can be your answer mainly because it can be read by a person who have those short spare time problems.

Becky Duncan:

A lot of guide has printed but it differs from the others. You can get it by world wide web on social media. You can choose the very best book for you, science, comic, novel, or whatever simply by searching from it. It is referred to as of book Biotechnology of Lignocellulose: Theory and Practice. You can add your knowledge by it. Without making the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about guide. It can bring you from one destination to other place.

Jacqueline Britt:

What is your hobby? Have you heard that question when you got scholars? We believe that that concern was given by teacher for their students. Many kinds of hobby, All people has different hobby. And also you know that little person such as reading or as looking at become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You find good news or update with regards to something by book. Different categories of books that can you take to be your object. One of them is niagra Biotechnology of Lignocellulose: Theory and Practice.
