Programming the Finite Element Method in Java and Android

Bryan J. Mac Donald

Programming the Finite Element Method in Java and Android Bryan J. Mac Donald

This book provides an introduction to programming the finite element method in Java for students, researchers and engineers who are reasonably familiar with the finite element method and want to learn how to write their own finite element code using Java. This book is written as an introductory text and it is assumed that the reader has little or no knowledge of object-oriented programming or Java. By concentrating on line elements, specifically structural trusses, it is possible to make the code very simple and relatively easy to understand. The philosophy of the book is to teach the reader how to write a very simple object-oriented finite element code in Java, with the understanding that once the reader has these skills they should easily be able to extend the code to more complex problems. As newcomers to programming find dealing with command line executed software frustrating and challenging; the Android operating system is used to develop a graphical user interface to allow the reader to interact with their Java code. Android provides a relatively simple (and very well supported) platform for coding a user interface and means that the finished application will work on any Android device (smartphone, tablet, etc.) The book is supported by a webpage which contains the source code for the Android app and other helpful material. The Android app that is detailed in the book is also available for download.

From reader reviews:

Nancy Tandy:

Hey guys, do you wish to find a new book you just read? Maybe the book with the concept Programming the Finite Element Method in Java and Android suitable to you? The particular book was written by a well-known writer in this era. The actual book entitled Programming the Finite Element Method in Java and Android is one of several books that will everyone read now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new way of measuring that you ever know previous to. The author explained their idea in the simple way, consequently all of people can easily to comprehend the core of this guide. This book will give you a large amount of information about this world now. So you can see the represented of the world on this book.

Francis Pilkington:

A lot of people always spent their particular free time to vacation or maybe go to the outside with their family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that's look different you can read a book. It is really fun for you personally. If you enjoy the book that you read you can spend all day long to reading a guide. The book Programming the Finite Element Method in Java and Android it is quite good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. Should you did not have enough space bringing this book you can buy the e-book. You can more simply to read this book from a smart phone. The price is not very costly but this book offers high quality.

Wayne Queen:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get wide range of stress from both day to day life and work. So, whenever we ask do people have extra time, we will say absolutely yes. People is human not really a huge robot. Then we question again, what kind of activity do you possess when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is usually Programming the Finite Element Method in Java and Android.

Stephen Harvey:

Reading can called head hangout, why? Because when you find yourself reading a book especially book entitled Programming the Finite Element Method in Java and Android your thoughts will drift away through every dimension, wandering in every single aspect that maybe not known for but surely will become your mind friends. Imaging every word written in a e-book then become one form conclusion and explanation this maybe you never get before. The Programming the Finite Element Method in Java and Android giving you an additional experience more than blown away your head but also giving you useful facts for your better life within this era. So now let us demonstrate the relaxing pattern this is your body and mind will be pleased

when you are finished examining it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?
