## Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science)

Paolo Sibani, Henrik Jeldtoft Jensen

Dynamical evolution over long time scales is a prominent feature of all the systems we intuitively think of as complex — for example, ecosystems, the brain or the economy. In physics, the term ageing is used for this type of slow change, occurring over time scales much longer than the patience, or indeed the lifetime, of the observer. The main focus of this book is on the stochastic processes which cause ageing, and the surprising fact that the ageing dynamics of systems which are very different at the microscopic level can be treated in similar ways.

The first part of this book provides the necessary mathematical and computational tools and the second part describes the intuition needed to deal with these systems. Some of the first few chapters have been covered in several other books, but the emphasis and selection of the topics reflect both the authors' interests and the overall theme of the book. The second part contains an introduction to the scientific literature and deals in some detail with the description of complex phenomena of a physical and biological nature, for example, disordered magnetic materials, superconductors and glasses, models of co-evolution in ecosystems and even of ant behaviour. These heterogeneous topics are all dealt with in detail using similar analytical techniques.

This book emphasizes the unity of complex dynamics and provides the tools needed to treat a large number of complex systems of current interest. The ideas and the approach to complex dynamics it presents have not appeared in book form until now.

## Contents:

- ***Complex Dynamics: Tools and Applications:***

- Characterization of Collective Dynamics
- Markovian Stochastic Processes
- Monte Carlo Methods
- Record Statistics and Extremal Statistics
- Complexity and Hierarchies
- Energy Landscapes
- Record Dynamics and Marginal Stability

- ***Complex Systems with Similar Dynamics:***

- Ageing of Spin Glasses
- Magnetic Relaxation in Superconductors
- Ageing of Colloids
- Evolving Biological Systems
- Non-stationary Ageing Dynamics in Ant Societies

- ***Epilogue:***

- What is Complexity Science?

**Readership:** Graduates and researchers with an interest in complex systems.

**From reader reviews:**

**Nicole Marcil:**

The book Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science) can give more knowledge and information about everything you want. Exactly why must we leave a good thing like a book Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science)? Several of you have a different opinion about reserve. But one aim that will book can give many facts for us. It is absolutely right. Right now, try to closer using your book. Knowledge or facts that you take for that, it is possible to give for each other; you may share all of these. Book Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science) has simple shape nevertheless, you know: it has great and large function for you. You can look the enormous world by open and read a reserve. So it is very wonderful.

**Sherry Stevens:**

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Having book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the ebooks. But also they write about the information about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write for their book. One of them is this Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science).

**Neil McNatt:**

People live in this new day of lifestyle always aim to and must have the spare time or they will get wide range of stress from both everyday life and work. So , whenever we ask do people have time, we will say absolutely without a doubt. People is human not really a huge robot. Then we inquire again, what kind of activity have you got when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you ever try this one, reading publications. It can be your alternative within spending your spare time, the book you have read is Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science).

**Charles Frye:**

Do you like reading a reserve? Confuse to looking for your best book? Or your book seemed to be rare? Why so many query for the book? But virtually any people feel that they enjoy for reading. Some people likes reading, not only science book but in addition novel and Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science) as well as others sources were given understanding for you. After you know how the good a book, you feel would like to read more and more. Science guide

was created for teacher or students especially. Those publications are helping them to add their knowledge. In different case, beside science e-book, any other book likes Stochastic Dynamics of Complex Systems:From Glasses to Evolution: 2 (Series on Complexity Science) to make your spare time considerably more colorful. Many types of book like this one.
