Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management (BPM) has been in existence for decades. It uses, complements, integrates and extends theories, methods and tools from other scientific disciplines like: strategic management, information technology, managerial accounting, operations management etc. During this period the main focus themes of researchers and professionals in BPM were: business process modeling, business process analysis, activity based costing, business process simulation, performance measurement, workflow management, the link between information technology and BPM for process automation etc. More recently the focus moved to subjects like Knowledge Management, Enterprise Resource Planning (ERP) Systems, Service Oriented Architectures (SOAs), Process Intelligence (PI) and even Social Networks. In this collection of papers we present a review of the work and the outcomes achieved in the classic BPM fields as well as a deeper insight on recent advances in BPM. We present a review of business process modeling and analysis and we elaborate on issues like business process quality and process performance measurement as weel as their link to all other organizational aspects like human resources management, strategy, information technology (being SOA, PI or ERP), other managerial systems, job descriptions etc. We also present recent advances to BPR tools with special focus on information technology, workflow, business process modeling and human resources management tools. Other chapters elaborate on the aspect of business process and organizational costing and their relationship to business process analysis, organizational change and reorganization. In the final chapters we present some new approaches that use fuzzy cognitive maps and a recently developed software tool for scenario creation and simulation in strategic management, business process management, performance measurement and social networking.

The audience of this book is quite wide. The first chapters can be read by professionals, academics and students who want to get some basic insight into the BPM field whereas the remaining present more elaborate and state of the art concepts methodologies and tools for an audience of a more advanced level.

From reader reviews:

James Sharpton:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite e-book and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Business Process Management: Theory and Applications (Studies in Computational Intelligence). Try to face the book Business Process Management: Theory and Applications (Studies in Computational Intelligence) as your pal. It means that it can to become your friend when you feel alone and beside associated with course make you smarter than in the past. Yeah, it is very fortuned in your case. The book makes you considerably more confidence because you can know every little thing by the book. So , we need to make new experience and knowledge with this book.

Kevin Applegate:

Within other case, little people like to read book Business Process Management: Theory and Applications (Studies in Computational Intelligence). You can choose the best book if you love reading a book. Providing we know about how is important any book Business Process Management: Theory and Applications (Studies in Computational Intelligence). You can add understanding and of course you can around the world by a book. Absolutely right, simply because from book you can recognize everything! From your country until foreign or abroad you will find yourself known. About simple issue until wonderful thing you may know that. In this era, we are able to open a book as well as searching by internet product. It is called e-book. You can use it when you feel bored to go to the library. Let's go through.

Linda Hill:

The book Business Process Management: Theory and Applications (Studies in Computational Intelligence) make you feel enjoy for your spare time. You should use to make your capable far more increase. Book can to become your best friend when you getting stress or having big problem using your subject. If you can make looking at a book Business Process Management: Theory and Applications (Studies in Computational Intelligence) being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You can know everything if you like open and read a reserve Business Process Management: Theory and Applications (Studies in Computational Intelligence). Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this publication?

Peggy Gillman:

Information is provisions for people to get better life, information currently can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider when those information which is inside the former life are challenging to be find than now could be taking seriously which one works to believe or which one the actual resource are convinced. If you get the

unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Business Process Management: Theory and Applications (Studies in Computational Intelligence) as the daily resource information.
