Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications)

Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications)

Cyber Physical Systems: Architectures, Protocols and Applications helps you understand the basic principles and key supporting standards of CPS. It analyzes different CPS applications from the bottom up, extracting the common characters that form a vertical structure. It presents mobile sensing platforms and their applications toward interrelated paradigms, highlighting and briefly discussing different types of mobile sensing platforms and the functionalities they offer. It then looks at the naming, addressing, and profile services of CPS and proposes a middleware component to meet the requirements of dynamic applications and sensors/actuators deployment/configurations across different platforms.

The middle chapters of the book present a context-aware sensor search, selection, and ranking model which addresses the challenge of efficiently selecting a subset of relevant sensors out of a large set of sensors with similar functionality and capabilities. The authors consider various topics in the energy management of CPS and propose a novel energy-efficient framework. They also present the fundamental networking technologies of CPS and focus on machine-to-machine communications for CPS, specifically the open technologies such as IPv6-based solutions that can be integrated into IoT and enable wireless sensor communications.

In the book's final chapters, the authors bring you up to date on mobile cloud computing (MCC) research activities that enhance the capabilities of resource-constrained smart devices in CPS sensory environments. They also present a few representative CPS applications, including connected healthcare, gaming in public transport crowds, and a series of MCC-enabled emerging CPS applications. You will find that these application fields fully demonstrate the great potential of applying CPS in public life.

From reader reviews:

Pearl Sanders:

As people who live in often the modest era should be revise about what going on or information even knowledge to make these people keep up with the era that is always change and make progress. Some of you maybe will update themselves by reading through books. It is a good choice to suit your needs but the problems coming to you actually is you don't know which you should start with. This Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Jose Scott:

Now a day those who Living in the era wherever everything reachable by talk with the internet and the resources within it can be true or not require people to be aware of each data they get. How people have to be smart in obtaining any information nowadays? Of course the reply is reading a book. Studying a book can help folks out of this uncertainty Information specially this Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) book because book offers you rich info and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it everybody knows.

Douglas Moskowitz:

The reserve with title Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) includes a lot of information that you can understand it. You can get a lot of benefit after read this book. That book exist new expertise the information that exist in this guide represented the condition of the world currently. That is important to yo7u to know how the improvement of the world. This book will bring you with new era of the globalization. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

David Clark:

Reading a book for being new life style in this season; every people loves to examine a book. When you go through a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you want to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, and soon. The Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) will give you a new experience in reading a book.
