Socio-Technical Networks: Science and Engineering Design

Socio-Technical Networks: Science and Engineering Design

While there are sporadic journal articles on socio-technical networks, there's long been a need for an integrated resource that addresses concrete socio-technical network (STN) design issues from algorithmic and engineering perspectives. Filling this need, **Socio-Technical Networks: Science and Engineering Design** provides a complete introduction to the fundamentals of one of the hottest research areas across the social sciences, networking, and computer science—including its definition, historical background, and models.

Covering basic STN architecture from a physical/technological perspective, the book considers the system design process in a typical STN, including inputs, processes/actions, and outputs/products. It covers current applications, including transportation networks, energy systems, tele-healthcare, financial networks, and the World Wide Web. A group of STN expert contributors addresses privacy and security topics in the interdependent context of critical infrastructure, which include risk models, trust models, and privacy preserving schemes.

- Covers the physical and technological designs in a typical STN
- Considers STN applications in popular fields, such as healthcare and the virtual community
- Details a method for mapping and measuring complexity, uncertainty, and interactions among STN components

The book examines the most important STN models, including graph theory, inferring agent dynamics, decision theory, and information mining. It also explains structural studies, behavioral studies, and agent/actor system studies and policy studies in different STN contexts. Complete with in-depth case studies, this book supplies the practical insight needed to address contemporary STN design issues.

From reader reviews:

Cary Burgess:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a walk, shopping, or went to the actual Mall. How about open or read a book titled Socio-Technical Networks: Science and Engineering Design? Maybe it is to become best activity for you. You already know beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with it is opinion or you have different opinion?

Michael Naylor:

Your reading sixth sense will not betray an individual, why because this Socio-Technical Networks: Science and Engineering Design guide written by well-known writer who knows well how to make book which might be understand by anyone who all read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your personal hunger then you still question Socio-Technical Networks: Science and Engineering Design as good book but not only by the cover but also by content. This is one publication that can break don't evaluate book by its include, so do you still needing one more sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

Raymond Roth:

Guide is one of source of knowledge. We can add our know-how from it. Not only for students but in addition native or citizen require book to know the up-date information of year to be able to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, could also bring us to around the world. By the book Socio-Technical Networks: Science and Engineering Design we can consider more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Only choose the best book that ideal with your aim. Don't become doubt to change your life with that book Socio-Technical Networks: Science and Engineering Design. You can more desirable than now.

Anthony Koch:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from a book. Book is published or printed or outlined from each source that filled update of news. In this particular modern era like now, many ways to get information are available for you. From media social like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just in search of the Socio-Technical Networks: Science and Engineering Design when you needed it?
