The Mind of the Child: A Psychoanalytical Study: Volume 5 (Collected Works of Charles Baudouin)
Charles Baudouin

Originally published in 1933, the author's ambition was to depict the child's mind as revealed to us by psychoanalysis. It was *not* intended to teach the technique of psychoanalysis as applied to children nor to formulate a methodology of education. The author starts by defining the concepts of psychoanalysis and children with reference to his earlier title dealing with psychoanalysis in relation to education: fundamental mechanisms; complexes; typical disturbances and methods. In this title he chooses to focus on complexes which he believed was 'the heart of the matter'. A great opportunity to read an early interpretation of psychoanalysis and its application to children.
