Moduli Spaces (London Mathematical Society Lecture Note Series)

Moduli Spaces (London Mathematical Society Lecture Note Series)

Moduli Spaces (London Mathematical Society Lecture Note Series)

Moduli theory is the study of how objects, typically in algebraic geometry but sometimes in other areas of mathematics, vary in families and is fundamental to an understanding of the objects themselves. First formalised in the 1960s, it represents a significant topic of modern mathematical research with strong connections to many areas of mathematics (including geometry, topology and number theory) and other disciplines such as theoretical physics. This book, which arose from a programme at the Isaac Newton Institute in Cambridge, is an ideal way for graduate students and more experienced researchers to become acquainted with the wealth of ideas and problems in moduli theory and related areas. The reader will find articles on both fundamental material and cutting-edge research topics, such as: algebraic stacks; BPS states and the P = W conjecture; stability conditions; derived differential geometry; and counting curves in algebraic varieties, all written by leading experts.

From reader reviews:

Lucinda Smith:

Reading a publication can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new data. When you read a guide you will get new information because book is one of various ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you studying a book especially tale fantasy book the author will bring one to imagine the story how the character types do it anything. Third, you could share your knowledge to other people. When you read this Moduli Spaces (London Mathematical Society Lecture Note Series), it is possible to tells your family, friends and also soon about yours reserve. Your knowledge can inspire others, make them reading a reserve.

Marie Williams:

Typically the book Moduli Spaces (London Mathematical Society Lecture Note Series) has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was authored by the very famous author. The author makes some research previous to write this book. That book very easy to read you will get the point easily after perusing this book.

Elizabeth Blake:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you decide to try be your object. One of them is actually Moduli Spaces (London Mathematical Society Lecture Note Series).

Michele Williams:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from a book. Book is prepared or printed or illustrated from each source that will filled update of news. In this modern era like now, many ways to get information are available for you actually. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search of the Moduli Spaces (London Mathematical Society Lecture Note Series) when you needed it?
