## **Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series)**

In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education -- mathematicians, mathematics educators, classroom teachers, and cognitive scientists. Members of these groups came from different traditions, had different perspectives, and rarely gathered in the same place to discuss issues of common interest. Part of the problem was that there was no common ground for the discussions -- given the disparate traditions and perspectives.

As one way of addressing this problem, the Sloan Foundation funded two conferences in the mid-1980s, bringing together members of the different communities in a ground clearing effort, designed to establish a base for communication. In those conferences, interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them.\*

A more recent conference -- upon which this volume is based -- offered a forum in which various people involved in education reform would present their work, and members of the broad communities gathered would comment on it. The focus was primarily on college mathematics, informed by developments in K-12 mathematics. The main issues of the conference were mathematical thinking and problem solving.

### **From reader reviews:**

#### **Sylvia Dasilva:**

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite publication and reading a guide. Beside you can solve your trouble; you can add your knowledge by the book entitled Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series). Try to stumble through book Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series) as your friend. It means that it can be your friend when you sense alone and beside that course make you smarter than ever. Yeah, it is very fortunate for you. The book makes you more confidence because you can know anything by the book. So, we need to make new experience in addition to knowledge with this book.

#### **Julia Barr:**

Are you kind of active person, only have 10 or 15 minute in your day time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are having problem with the book when compared with can satisfy your short time to read it because this all time you only find e-book that need more time to be examine. Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series) can be your answer as it can be read by you who have those short extra time problems.

#### **Christopher Parker:**

Reserve is one of source of expertise. We can add our knowledge from it. Not only for students but also native or citizen want book to know the update information of year to be able to year. As we know those publications have many advantages. Beside most of us add our knowledge, could also bring us to around the world. Through the book Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series) we can acquire more advantage. Don't you definitely be creative people? To get creative person must prefer to read a book. Just choose the best book that appropriate with your aim. Don't always be doubt to change your life with this book Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series). You can be more attractive than now.

#### **Hoa Gilkey:**

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is written or printed or created from each source in which filled update of news. On this modern era like today, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Mathematical Thinking and Problem Solving (Studies in Mathematical Thinking and Learning Series) when you desired it?
