Regional Therapeutics for Advanced Malignancies

Martin D. Goodman

Regional Therapeutics for Advanced Malignancies Martin D. Goodman

Regional Therapeutics for Advanced Malignancies is the most comprehensive collaboration by some of the world's experts from UK, USA and Australia. This book will be of great help for educating and guiding medical professionals who treat patients with such difficult scenarios. The text is thoroughly supported by color illustrations. This book discusses the latest in regional therapeutic options instead of systemic options for certain disease sites. It divided into four sections covering peritoneal disease, gynecological malignancies, melanoma, sarcoma of lung and Liver. Physicians will be able to review treatment plans for cancers that spread to the liver, lung, peritoneum, and soft tissues. Types of therapies include hyperthermic intraperitoneal chemotherapy, liver directed therapies, limb perfusion for melanoma and sarcoma, and other cutting edge treatments. This book can be used as a tool by physicians who treat cancer patients with metastatic disease.
