Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights) John Polo, Tom Mackay, Akhlesh Lakhtakia

For decades, the surface-plasmon-polariton wave guided by the interface of simple isotropic materials dominated the scene. However, in recent times research on electromagnetic surface waves guided by planar interfaces has expanded into new and exciting areas. In the 1990's research focused on advancing knowledge of the newly discovered Dyakonov wave. More recently, much of the surface wave research is motivated by the proliferation of nanotechnology and the growing number of materials available with novel properties. This book leads the reader from the relatively simple surface-plasmon-polariton wave with isotropic materials to the latest research on various types of electromagnetic surface waves guided by the interfaces of complex materials enabled by recent developments in nanotechnology. This includes: Dyakonov waves guided by interfaces formed with columnar thin films, Dyakonov-Tamm waves guided by interfaces formed with sculptured thin films, and multiple modes of surface-plasmon-polariton waves guided by the interface of a metal and a periodically varying dielectric material.

- Gathers research from the past 5 years in a single comprehensive view of electromagnetic surface waves.
- Written by the foremost experts and researchers in the field.
- Layered presentation explains topics with an introductory overview level up to a highly technical level.

From reader reviews:

Barbara Spangler:

Have you spare time for any day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a walk, shopping, or went to typically the Mall. How about open or even read a book allowed Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights)? Maybe it is for being best activity for you. You know beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with its opinion or you have some other opinion?

Ian Coghlan:

Book is to be different for every single grade. Book for children until adult are different content. As we know that book is very important usually. The book Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights) was making you to know about other expertise and of course you can take more information. It is very advantages for you. The publication Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights) is not only giving you more new information but also to become your friend when you really feel bored. You can spend your own spend time to read your reserve. Try to make relationship with the book Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights). You never feel lose out for everything should you read some books.

Maria Forshee:

Playing with family in the park, coming to see the water world or hanging out with good friends is thing that usually you have done when you have spare time, subsequently why you don't try thing that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights), you can enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.

Lynne Young:

What is your hobby? Have you heard in which question when you got pupils? We believe that that problem was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person just like reading or as studying become their hobby. You should know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you take to be your object. One of them are these claims Electromagnetic Surface Waves: A Modern Perspective (Elsevier Insights).
