Trade and Human Health and Safety

Trade and Human Health and Safety

First published in 2006, this book gathers papers from distinguished experts discussing how health-based trade-restrictive measures have fared in WTO case law. With an analysis of applicable primary law (GATT, TBT, and SPS) and all case law in the area of trade and health, this book offers a comprehensive discussion on the standards established for the regulation of public health and safety issues. Experts in the field answer two important questions: how can a country which is a member of the WTO define its policy on health issues; and what are the WTO constraints on the exercise of health policy, if any? The various contributions in this volume aim to demonstrate how the world trading regime has come of age and accepted that trade liberalization cannot take place at the expense of nationally defined social values.
