Learning Together Online: Research on Asynchronous Learning Networks

Learning Together Online: Research on Asynchronous Learning Networks

Learning Together Online: Research on Asynchronous Learning Networks
This book is about the past and future of research on the effectiveness of learning networks (also known as "e-learning" or "online learning" or "Web-based learning"). Learning networks are groups of people using computer technology, communicating and collaborating online to build knowledge together. Over the past decade there has been an explosion not only of online courses, but also of studies on them.

In *Learning Together Online: Research on Asynchronous Learning Networks,* leading researchers in the field use an integrated theoretical framework, which they call "Online Interaction Learning Theory," to organize what past research shows and where future research is going. It models the variables and processes that are important in determining the relative effectiveness of online learners working to reach a deeper level of understanding by interacting with each other and with the texts under investigation.

Now that there have been hundreds of studies and thousands of courses offered online, what does the empirical evidence show? This book addresses the question directly by presenting what is known from research results about how to design and teach courses effectively online, ranging from the organizational context and characteristics of students to learning theories and research design methods. It also provides a research agenda for the next decade.

Learning Together Online: Research on Asynchronous Learning Networks is both a textbook for graduate students and a professional reference for faculty teaching online, researchers conducting studies, and graduate students taking courses about learning technologies who need to know the state of the art of research in the area of online learning.

From reader reviews:

Ginger Knowles:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each book has different aim or maybe goal; it means that guide has different type. Some people experience enjoy to spend their time to read a book. These are reading whatever they have because their hobby is actually reading a book. Consider the person who don't like looking at a book? Sometime, individual feel need book if they found difficult problem or perhaps exercise. Well, probably you will want this Learning Together Online: Research on Asynchronous Learning Networks.

Viola Waters:

This Learning Together Online: Research on Asynchronous Learning Networks book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is information inside this e-book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This specific Learning Together Online: Research on Asynchronous Learning Networks without we recognize teach the one who studying it become critical in contemplating and analyzing. Don't become worry Learning Together Online: Research on Asynchronous Learning Networks can bring if you are and not make your tote space or bookshelves' turn out to be full because you can have it in your lovely laptop even mobile phone. This Learning Together Online: Research on Asynchronous Learning Networks having fine arrangement in word along with layout, so you will not truly feel uninterested in reading.

Mary Barrientes:

Information is provisions for those to get better life, information presently can get by anyone at everywhere. The information can be a knowledge or any news even a concern. What people must be consider when those information which is within the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you find the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Learning Together Online: Research on Asynchronous Learning Networks as your daily resource information.

Antonio Fells:

In this particular era which is the greater individual or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple approach to have that. What you are related is just spending your time not much but quite enough to experience a look at some books. One of the books in the top record in your reading list is definitely Learning Together Online: Research on Asynchronous Learning Networks. This book that is qualified as The Hungry Hills can get you closer in becoming precious person. By looking way up and review this e-book you can get many advantages.
