The Planning Game: An Information Economics Approach to Understanding Urban and Environmental Management Alex Lord

Trading information is an essential aspect of the negotiations that underpin planning practice across the globe. In this book, Alex Lord uses information economics to outline a way of thinking about these negotiations that places the strategies that actors in the planning game use at the heart of the debate.

Dialogue between economics and planning theorists has been, until now, rare. Lord argues that information economics' tool kit, game theory – including well-known examples such as the Prisoners' Dilemma, the Stag Hunt game and Follow the Leader – offers an analytical framework ideally suited to unpacking planning processes.

This use of game theory to understand how counterparties interact draws together two distinct bodies of literature: firstly the mainstream economics treatment of games in abstract form and, secondly, accounts of actual bargaining in planning practice from a host of international empirical studies.

Providing a novel alternative to existing theories of planning, *The Planning Game* provides an explanation of how agencies interact in shaping the trajectory of development through the application of game theory to planning practice.

That The Planning Game: An Information Economics Approach to Understanding Urban and Environmental Management can give you a lot of friends because by you considering this one book you have point that they don't and make an individual more like an interesting person. That book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't realize, by knowing more than other make you to be great individuals. So , why hesitate? We need to have The Planning Game: An Information Economics Approach to Understanding Urban and Environmental Management.

Mary Curtis:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this The Planning Game: An Information Economics Approach to Understanding Urban and Environmental Management can make you feel more interested to read.
