## **Global Mobility Regimes** Rey Koslowski

Global mobility refers to movements of people across international borders for any length of time or purpose. In addition to the world's 214 million migrants, there are more than two billion annual border crossings of tourists, students, business people and commuters who travel internationally for stays of less than a year. This volume considers "global mobility" as an alternative concept to "international migration" in order to gain insights into international cooperation on movements of people across international borders; examines a set of interacting global mobility regimes: the established international refugee regime, a latent but strengthening international travel regime and a non-existent but potential international labor migration regime; and explores the possibilities of increasing international cooperation, especially through linkages among these three issue areas.
