Finally. A Good Book On Building a Dulcimer.

How does \$29.95 sound versus \$900.00 or \$1,500.00? If cost is a consideration and you enjoy a good project, this book is for you! Full of photographs, illustrations, patterns, clear instructions and helpful advice, this book guides you step-by-step through the crafting of a professional model 15/14 hammered dulcimer with a floating soundboard. Randy "Ardie" Davis takes you through the secrets of building a hammered dulcimer that will look beautiful and sound even better. Materials, tools, suppliers, resources - all are covered in this thorough and easy-to-follow book.

Over 185 pages of clear, proven instructions, incorporating Ardie's unique "Maker's Notes," "Maker's Hints," and "Maker's Cautions" that provide the reader with Ardie's years of woodworking experience. Ardie covers all of the tools used to make the dulcimer, and points out which are "nice to have" and which are essential. He provides a brief description of why and how each tool is used.

Ardie's illustrations are comprehensive and easy to understand. He leaves nothing to chance or guesswork when it comes to explaining each step. From cutting the first board to stringing and tuning - he covers it all!

An essential part of building a hammered dulcimer is the use of accurate patterns. Included in the book are pre-printed patterns for Pin Blocks, Treble Bridge, Bass Bridge, the Side Bridges, and a beautiful design for the sound hole. Simply tear them out, cut and tape together, and go to work!
