## Biological Control of Weeds in Australia

Biological control of weeds has been practised for over 100 years and Australia has been a leader in this weed management technique. The classical example of control of prickly pears in Australia by the cactus moth *Cactoblastis cactorum*, which was imported from the Americas, helped to set the future for biocontrol of weeds in many countries. Since then there have been many projects using Classical Biological Control to manage numerous weed species, many of which have been successful. Importantly, there have been no serious negative non-target impacts – the technique, when practised as it is in Australia, is safe and environmentally friendly. Economic assessments have shown that biocontrol of weeds in Australia has provided exceedingly high benefit-to-cost ratios.

This book reviews biological control of weeds in Australia to 2011, covering over 90 weed species and a multitude of biological control agents and potential agents. Each chapter has been written by practising biological control of weeds researchers and provides details of the weed, the history of its biological control, exploration for agents, potential agents studied and agents released and the outcomes of those releases. Many weeds were successfully controlled, some were not, many projects are still underway, some have just begun, however all are reported in detail in this book.

Biological Control of Weeds in Australia will provide invaluable information for biological control researchers in Australia and elsewhere. Agents used in Australia could be of immense value to other countries that suffer from the same weeds as Australia. The studies reported here provide direction to future research and provide examples and knowledge for researchers and students.

### **From reader reviews:**

#### **Angela Thomas:**

The guide untitled Biological Control of Weeds in Australia is the publication that recommended to you to read. You can see the quality of the e-book content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, hence the information that they share for your requirements is absolutely accurate. You also will get the e-book of Biological Control of Weeds in Australia from the publisher to make you a lot more enjoy free time.

#### **Sharonda Adair:**

The publication with title Biological Control of Weeds in Australia has a lot of information that you can study it. You can get a lot of benefit after read this book. This particular book exist new knowledge the information that exist in this publication represented the condition of the world now. That is important to you to understand how the improvement of the world. This book will bring you within new era of the global growth. You can read the e-book on the smart phone, so you can read the item anywhere you want.

#### **Rebecca Moreno:**

You may spend your free time to study this book this book. This Biological Control of Weeds in Australia is simple to deliver you can read it in the area, in the beach, train and also soon. If you did not get much space to bring the printed book, you can buy the e-book. It is make you better to read it. You can save the particular book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

#### **Palmer Schwartz:**

As we know that book is vital thing to add our expertise for everything. By a reserve we can know everything we wish. A book is a set of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This publication Biological Control of Weeds in Australia was filled concerning science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has different feel when they reading some sort of book. If you know how big advantage of a book, you can feel enjoy to read a e-book. In the modern era like at this point, many ways to get book that you simply wanted.
