Service-oriented architecture (SOA) uses services as the baseline for developing new architectures and applications, as networks are built specifically to satisfy service requirements. Most services are currently handled over different networks, but newer services will soon require cross-network support. Architecting the Telecommunication Evolution: Toward Converged Network Services outlines the challenges of providing crossover services and the new architectures and protocols that will enable convergence between circuit- and packet-switched networks.

Taking a standards-based approach to converged services, this book lays a foundation for SOA in telecommunications. The authors begin by outlining the development of Internet telephony, focusing on how to use the respective benefits of the traditional public switched telephone network (PSTN) and the Internet to create and implement more value-added services. These two eminent specialists first examine services that originate in the Internet and take advantage of PSTN services, and then explore how discrete events on the PSTN can be used as an impetus to creating services on the Internet. They conclude with a discussion on how this convergence creates smart spaces in the telecoms domain.

Including eight valuable appendices that will aid in the implementation of converged services, Architecting the Telecommunication Evolution is the first book of its kind to offer a survey as well as a practical roadmap to integrating modern networks to achieve better performance and new functionality.

From reader reviews:

Shannon Grant:

Have you spare time for any day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a move, shopping, or went to typically the Mall. How about open as well as read a book titled Architecting the Telecommunication Evolution: Toward Converged Network Services: v.ution (Informa Telecoms & Media)? Maybe it is to get best activity for you. You know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with its opinion or you have various other opinion?

Terry Carr:

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make them survives, being in the middle of the crowded place and notice by surrounding. One thing that at times many people have underestimated this for a while is reading. Sure, by reading a guide your ability to survive increase then having chance to stay than other is high. For you personally who want to start reading the book, we give you this kind of Architecting the Telecommunication Evolution: Toward Converged Network Services: v.ution (Informa Telecoms & Media) book as beginner and daily reading publication. Why, because this book is usually more than just a book.

Aubrey Smith:

Reading a book to get new life style in this season; every people loves to read a book. When you study a book you can get a wide range of benefit. When you read books, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, in addition to soon. The Architecting the Telecommunication Evolution: Toward Converged Network Services: v.ution (Informa Telecoms & Media) offer you a new experience in reading through a book.

Willa Killeen:

Many people spending their time frame by playing outside along with friends, fun activity using family or just watching TV the whole day. You can have new activity to enjoy your whole day by studying a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Cell phone. Like Architecting the Telecommunication Evolution: Toward Converged Network Services: v.ution (Informa Telecoms & Media) which is finding the e-book version. So , why not try out this book? Let's notice.
