Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series) Xu Jiagu

Olympiad mathematics is not a collection of techniques of solving mathematical problems but a system for advancing mathematical education.

This book is based on the lecture notes of the mathematical Olympiad training courses conducted by the author in Singapore. Its scope and depth not only covers and exceeds the usual syllabus, but introduces a variety concepts and methods in modern mathematics.

In each lecture, the concepts, theories and methods are taken as the core. The examples are served to explain and enrich their intension and to indicate their applications. Besides, appropriate number of test questions is available for reader's practice and testing purpose. Their detailed solutions are also conveniently provided.

The examples are not very complicated so that readers can easily understand. There are many real competition questions included which students can use to verify their abilities. These test questions are from many countries, e.g. China, Russia, USA, Singapore, etc. In particular, the reader can find many questions from China, if he is interested in understanding mathematical Olympiad in China.

This book serves as a useful textbook of mathematical Olympiad courses, or as a reference book for related teachers and researchers.

Contents

• Volume 2:

- Congruence of Integers
- Decimal Representation of Integers
- Pigeonhole Principle
- Linear Inequality and System of Linear Inequalities
- Inequalities with Absolute Values
- Geometric Inequalities
- Solutions to Testing Questions

- and other chapters

Readership: Mathematics students, school teachers, college lecturers, university professors; mathematics enthusiasts.

From reader reviews:

Jordan Sampson:

Have you spare time for a day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a move, shopping, or went to often the Mall. How about open or read a book called Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series)? Maybe it is to be best activity for you. You know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have some other opinion?

Holly Hughes:

Hey guys, do you wants to finds a new book to study? May be the book with the name Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series) suitable to you? The particular book was written by well-known writer in this era. The actual book untitled Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series)is the main of several books that will everyone read now. That book was inspired many men and women in the world. When you read this guide you will enter the new dimension that you ever know previous to. The author explained their plan in the simple way, and so all of people can easily to comprehend the core of this guide. This book will give you a wide range of information about this world now. To help you to see the represented of the world on this book.

James Johnson:

Often the book Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series) will bring you to the new experience of reading a new book. The author style to describe the idea is very unique. In case you try to find new book to read, this book very suited to you. The book Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical Olympiad Series) is much recommended to you to learn. You can also get the e-book in the official web site, so you can quicker to read the book.

Bonnie Vassallo:

Reading a book tends to be new life style in this particular era globalization. With reading through you can get a lot of information that can give you benefit in your life. Along with book everyone in this world may share their idea. Publications can also inspire a lot of people. Many author can inspire their very own reader with their story or maybe their experience. Not only the story that share in the textbooks. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some investigation before they write for their book. One of them is this Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 2: 6 (Mathematical

Olympiad Series).
