Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics)

Łukasz Piasecki

Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) Łukasz Piasecki

Classification of Lipschitz Mappings presents a systematic, self-contained treatment of a new classification of Lipschitz mappings and its application in many topics of metric fixed point theory. Suitable for readers interested in metric fixed point theory, differential equations, and dynamical systems, the book only requires a basic background in functional analysis and topology.

The author focuses on a more precise classification of Lipschitzian mappings. The mean Lipschitz condition introduced by Goebel, Japón Pineda, and Sims is relatively easy to check and turns out to satisfy several principles:

- Regulating the possible growth of the sequence of Lipschitz constants $k(T^n)$
- Ensuring good estimates for $k_0(T)$ and $k_\infty(T)$
- Providing some new results in metric fixed point theory

From reader reviews:

Brenda Schweiger:

Book is to be different for every grade. Book for children right up until adult are different content. As you may know that book is very important usually. The book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) was making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) is not only giving you far more new information but also to get your friend when you sense bored. You can spend your current spend time to read your publication. Try to make relationship with the book Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics). You never sense lose out for everything if you read some books.

David Giles:

Reading a book can be one of a lot of task that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new facts. When you read a reserve you will get new information due to the fact book is one of many ways to share the information or perhaps their idea. Second, looking at a book will make a person more imaginative. When you reading a book especially fictional book the author will bring someone to imagine the story how the personas do it anything. Third, you are able to share your knowledge to other folks. When you read this Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics), you are able to tells your family, friends and also soon about yours guide. Your knowledge can inspire average, make them reading a guide.

Cassandra Tucker:

The book untitled Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) contain a lot of information on that. The writer explains the girl idea with easy way. The language is very simple to implement all the people, so do not worry, you can easy to read the idea. The book was compiled by famous author. The author provides you in the new era of literary works. It is easy to read this book because you can please read on your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice study.

Debra Weeks:

Don't be worry should you be afraid that this book may filled the space in your house, you may have it in e-book way, more simple and reachable. This particular Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics) can give you a lot of close friends because by you investigating this one book you have point that they don't and make anyone more like an interesting person. This specific book can be one of a step for you to get success. This publication offer you information that maybe your

friend doesn't learn, by knowing more than different make you to be great individuals. So , why hesitate? Let us have Classification of Lipschitz Mappings (Chapman & Hall/CRC Pure and Applied Mathematics).
