**The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological** Salvatore Esposito  
Through just a handful of papers, Ettore Majorana left an indelible mark in the fields of physics, mathematics, computer science and even economics before his mysterious disappearance in 1938. It is only now that the importance of Majorana's work is being realised: Majorana fermions are intensely studied today, and his work on neutrino physics has provided possible explanations for the existence of dark matter. In this unique volume, Salvatore Esposito explores not only Majorana's known papers but, even more interestingly, unveils his unpublished works as well. These include powerful methods and results, ranging from the atomic two-centre problem, the Thomas–Fermi model and ferromagnetism to quasi-stationary states, n-component relativistic wave equations and quantum scalar electrodynamics. Featuring biographical notes and contributions from leading experts Evgeny Akhmedov and Frank Wilczek, this fascinating book will captivate graduate students and researchers interested in frontier science as well as in the history of science.

### **From reader reviews:**

#### **Betty Lavery:**

Typically the book The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological has a lot info on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research prior to write this book. This book very easy to read you can obtain the point easily after perusing this book.

#### **Elmer August:**

Your reading sixth sense will not betray a person, why because this The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological e-book written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still skepticism The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological as good book not just by the cover but also by content. This is one publication that can break don't determine book by its handle, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading sixth sense already told you so why you have to listening to an additional sixth sense.

#### **Heather Robertson:**

That e-book can make you to feel relax. This particular book The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological was bright colored and of course has pictures around. As we know that book The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological has many kinds or genre. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that.

#### **Elizabeth Daugherty:**

A lot of people said that they feel uninterested when they reading a e-book. They are directly felt it when they get a half parts of the book. You can choose the actual book The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological to make your reading is interesting. Your personal skill of reading proficiency is developing when you such as reading. Try to choose straightforward book to make you enjoy to study it and mingle the opinion about book and studying especially. It is to be 1st opinion for you to like to start a book and examine it. Beside that the reserve The Physics of Ettore Majorana: Theoretical, Mathematical, and Phenomenological can to be a newly purchased friend when you're really feel alone and confuse in doing what must you're doing of the time.
