**Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses)** Onur Hamza Karabey

This book describes the characterization of liquid crystal materials at microwave frequencies and the usage of these materials in reconfigurable planar antennas and in their electrical tunable components. It reports for the first time the realization of a two-dimensional electronic beam steering antenna and polarization agile planar antennas with liquid crystal display technology. It gives a detailed description of all the theoretical analyses, modeling and design methods that were involved in the realization of these devices as well as their validation using measurement of demonstrative prototypes. This book also shows that low profile, low cost, high gain, electronic beam steering and polarization agile antennas can be fabricated in larger sizes by using existing automated liquid crystal display manufacturing techniques. The innovative ideas and method described in this work represent a considerable advancement in the field of electronically reconfigurable antennas based on liquid crystal technology and are expected to draw significant interest in the future. Such antennas may become important, for example, in mobile terminals integrated into the body of laptops (in the cover) or of automobiles (in the rooftop), ships or boats, for which flat, low-profile and low-cost antennas are required.

### **From reader reviews:**

#### **Avis Zeiger:**

As people who live in the particular modest era should be update about what going on or info even knowledge to make them keep up with the era which can be always change and progress. Some of you maybe will certainly update themselves by reading through books. It is a good choice in your case but the problems coming to anyone is you don't know which you should start with. This Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses) is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

#### **Kathryn Richardson:**

Do you have something that you enjoy such as book? The guide lovers usually prefer to opt for book like comic, brief story and the biggest one is novel. Now, why not striving Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses) that give your entertainment preference will be satisfied by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react towards the world. It can't be stated constantly that reading behavior only for the geeky person but for all of you who wants to become success person. So , for all of you who want to start reading as your good habit, you can pick Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses) become your starter.

#### **Kevin Kennard:**

In this period globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended to you is Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses) this publication consist a lot of the information with the condition of this world now. This book was represented just how can the world has grown up. The words styles that writer use for explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book acceptable all of you.

#### **Albert Matthews:**

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful pics on

there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Electronic Beam Steering and Polarization Agile Planar Antennas in Liquid Crystal Technology (Springer Theses) can make you truly feel more interested to read.
