Marx, the Body, and Human Nature

John Fox

Marx, the Body, and Human Nature John Fox

Marx, the Body, and Human Nature demonstrates that prior considerations of Marx's works did not place a sufficient emphasis on the difficulties and promise of bodily experience. Fox provides a fresh 'take' on Marx, revealing how he drew on philosophers ranging from Aristotle to Feuerbach to present a much more open, dynamic and unstable conception of the body and the self. The result is a theory of human nature that is of great contemporary relevance, particularly for those interested in the body and embodiment, and those who wish to contest exaggerated notions of independence and individuality.
