## Transplant Administration Lisa Norris

This timely new book, written by a transplant administrator with over sixteen years of experience, along with other expert contributors, covers the specifics of each aspect of transplant administration, providing information that will enable new administrators to quickly master essentials, help more seasoned administrators evaluate and improve their programs, and generally provide a knowledge base, focused on best-practices in light of regulatory requirements, for transplant surgeons, aspirant administrators and hospital administrators.

- Comprehensively covers all aspects of transplant program administration, including management, finance, staffing, quality improvement, patient intake, communication and collaboration with clinical staff, and more.
- Emphasizes practical application of best practices; uses bullet lists and other features to highlight essential information for each topic covered.
- Accompanying "Toolkit", available via the book's companion website, provides forms, a procedural manual, program assessment materials and more which buyers can use "out of the box" or adapt for use in their own program.

While the book and its supplemental materials have been created specifically with the US transplant community in mind, they still have considerable value for transplant administrators and related professionals outside the US, for instance, transplantation and health policy researchers, hospital management staff who are tasked with starting a transplant program from scratch and who need ready-made materials they can adapt to suit their own regulatory environment, and others.
